## Prime Learning Challenge: How can we get there?

### Key language

I think it will \_\_\_\_\_ because \_\_\_\_\_ .

It is \_\_\_\_\_ and \_\_\_\_\_.

I made this \_\_\_\_\_ .

I like this because \_\_\_\_\_ .

I remember \_\_\_\_\_ .

I have been on \_\_\_\_\_ .

### Key facts: Transport

- Transport is the way people or things are moved from one place to another
- There are many different ways in which people or things can be transported. Sometimes methods of transport don't work because of the environment that people live in
- Transport changes through time; as technology gets more advanced so does the way we transport goods and people
- Transports can move in a variety of directions but this can depend on how they move. If they use wheels to move, they can move in different ways and paths than boats and helicopters can
- There are lots of ways you can make vehicles go faster. If their cargo is lighter, they will go faster. If their cargo is heavier, they will travel more slowly.

# Key facts: changes in travel
