## Prime Learning Challenge: Who do these footprints belong to?

### Key language: structure of a plant

stem

The stem moves water around the plant and keeps the plant upright so it can get more sunlight.

petal

Petals are bright to attract insects to the flower to collect pollen.

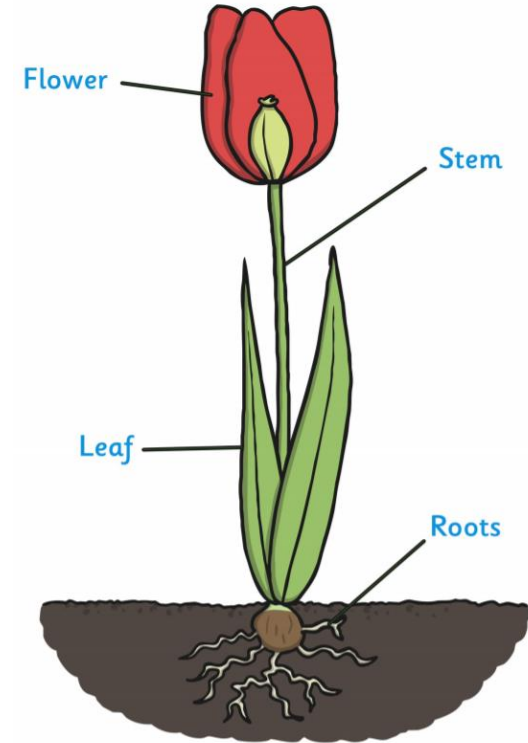

root

The roots absorb water and minerals which keep the plant alive. They also anchor the plant in place.

leaves

Leaves make food for the plant using carbon dioxide in the air.

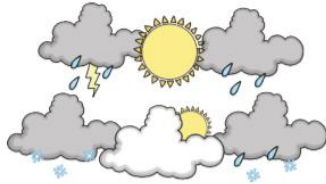

The \_\_\_\_\_ is important for the plant because...

A plant has \_\_\_\_\_ so it can...

## Physical Geography

*Natural parts of our world*

weather

beach

hills

river

cliff

seasons

## Human Geography

*Human-made creations*

city

town

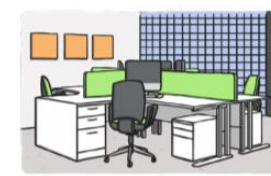

village

shop

house

office

*A physical feature is...*
